EXPERIENCE

Coursio, Stockholm, Sweden — *Full stack developer*

FEBRUARY 2017 - PRESENT

Rebuild the company's infrastructure from scratch in order to meet new business requirements. Migrate the legacy PHP/MySQL monolithic backend into a modern, microservices–based Node/GraphQL API with a MongoDB database.

Flow System AB, Stockholm, Sweden — *Web developer*

JUNE 2015 - JANUARY 2017

Designed and implemented new features for a digital contracts WYSIWYG editor. In charge of the client architecture, I also co–led the main framework's migration from Backbone to React, and shaped the product's testing strategy.

Potentialpark, Sweden — *Full stack developer*

AUGUST 2012 - MAY 2015

Led the migration of the company's flagship product from Excel worksheets to a set of modern components, creating new business opportunities and saving 4 months/year of the team's work time.

Created and managed the new platform, composed of several databases (SQL, Redis, MongoDB), Node.js servers (REST API) and frontend Angular apps, deployed on AWS.

Conducted UX research for Fortune 500 decision makers.

EDUCATION / CERTIFICATIONS

Toulouse Business School, Copenhagen Business School (Erasmus) — *Master of international business*

2008 - 2012

MongoDB Inc. — *MongoDB certified developer*

2015
